Amy's Flashcards

www.amysflashcards.com

The pictures below represent some common piano chords along with Amy's fingerings for those chords. This drill is not intended for absolute beginners. If it seems very hard for you, just start with three chords, C, F, and G. Learn those well and you can play many songs just using those three chords. Then begin to add a few more chords to the online drill until you've mastered the top row. Then begin to add chords from row 2 to the online drill. Continue in this manner until you've mastered the whole chart.
