Amy's Flashcards
Guitar Fretboard Drill

Start with the six open string notes. Then add one fret at a time until you master all of the notes that you desire. For many of you that would cover the open strings and the first four frets. That's 30 notes. I included all of the frets for more advanced players. Remember to move your mouse randomly over the notes in your current range. Say the note out loud before pointing to the target and displaying the answer. (note: the sharp notes can also be named with flats. example: F# is equivalent to Gb)
